WORK EXPERIENCE

Frontend Engineer ANS software solutions

01/2023 - 01/2025

Role and Responsibility

- Developed Mutual Funds Investment Site and android app. Collaborated on building a investment platform, enabling users to invest in mutual, track their investment and analyze their profits and losses.
- Ensured the site was fully responsive and optimized for various devices, providing a seamless user experience across desktops.
- Worked closely with backend developers, designers, and stakeholders using Git for version control and collaboration.

PERSONAL PROJECTS

E-Commerce site (10/2023 - 11/2023)

- Developed a simple e-commerce site with essential functionalities such as product listings, shopping cart, checkout process, signup and login system and user account management like add, edit, delete user details.
- Fully responsive site built using Tailwind CSS to ensure better user experience across various desktop sizes.
- Enhanced product listing with features such as sorting, filtering, and pagination for a streamlined user experience and easy product navigation.
- Utilized the redux to handle global state management, incorporating Redux Toolkit features like createAsyncThunk, createSlice, and extraReducers for efficient API call handling.

GoFood - Food Delivery App (09/2023 - 10/2022)

- A responsive food delivery app using React, MongoDB, and Express, It has all essential functionalities such as searching for food, ordering, add to cart, and displaying previous orders, ensuring a seamless user experience across various devices using jwt token.
- Implemented secure authentication Signup and Login system, with user data securely stored in MongoDB.
- Created the custom hook to efficiently manage cart functionalities, including adding, editing, and deleting items, optimizing state management and user interaction.

Admin Dashboard (11/2023 - 12/2023)

- Implemented an admin dashboard for an e-commerce site, allowing administrators to efficiently add and manage product categories and subcategories.
- Uses Next.js and Shadcn/ui component library for a responsive design and prisma ORM for type safe query builder and postgres for database.
- Implemented Clerk to manage user authentication and data, allowing users to sign up and log in using Google. Provided functionalities for users to delete or unlink their accounts from the site.

Plura Website Builder (02/2020 - Present)

- A live project built using Next.js, Prisma and Myql which allows user to build websites.
- A user can create multiple subaccounts and give them specific permissions to access particular services.
